

GLENDALE CREEK:

The Story Of A Stream

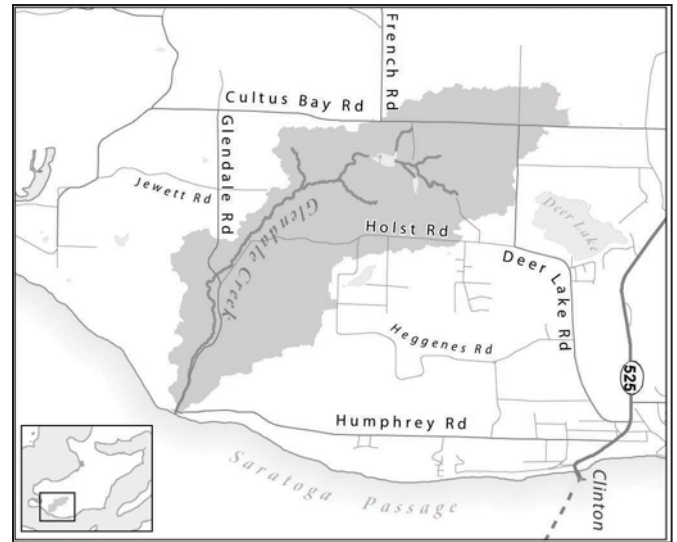

Alternate Thursdays

Feb 18 – April 15, 2010

6:30 – 8 pm

Clinton Community Hall

Hwy 525 & Central Avenue

A series of talks and discussions designed to explore biological and geological aspects of the creek, the ecosystem it supports, human interactions with Glendale Creek past and present, and the salmon recovery system, before a recommendation is made on needed road and stream repairs following the Glendale Road washout.

This series is offered to all residents of Whidbey Island and interested parties at no charge. For those unable to attend in person, speaker information and resources will be posted at:
